

Jacobsen® Rollers

Rollers play a critical role in providing consistent, even support for the mower, particularly the cutting unit. That's why Jacobsen® offers a complete selection of rollers to meet the cutting performance and ground following you desire, regardless of the application.

Front Rollers

Grooved Machined Aluminum

Grooves in the roller allow the cutting unit to sit further down into the turf for a more aggressive cut and improved straight-line tracking.

Grooved Machined Steel

Provides the performance advantages of the grooved aluminum roller, however, the steel is heavier which results in an even more aggressive cut.

Grooved Segmented Machined Aluminum

This grooved machined aluminum system features three segments. These segments can rotate at different speeds, making tight turns on greens easier when doing cleanup passes.

Grooved Assembly Steel Disc

Wide spacing between the discs makes these rollers the most aggressive; recommended for straight-line mowing only.

Solid Tubes

Available in light or heavy versions; both are less aggressive than grooved rollers making them ideal for use on turf under stress. They are better than full-length grooved rollers for tight turns on cleanup passes because solid rollers slide across the turf. The heavier roller is slightly more aggressive. Rollers feature a scraper to prevent debris buildup.

Rear Rollers

These rollers help to support the cutting unit and ensure there is a consistent height of cut across the unit. The rear roller also delivers a manicured, striping effect after the cut.

22" Solid tube roller	1003728	LF550, LF570, LF-4677 (LF-3400, LF-3800, LF-3407, LF-4675, LF-135)	2-1/2	10
22" Solid tube roller	1002446	LF550, LF570, LF-4677 (LF-3400, LF-3800, LF-3407, LF-4675, LF-135)	2-1/2	10
26" Solid tube steel roller	132639	Tri-King (26")	2-1/2	12
30" Solid tube steel roller	132640	Tri-King (30")	2-1/2	13
26" Roller scraper	67909	Tri-King (26"), TR-3	N/A	3
30" Roller scraper	67910	Tri-King (30")	N/A	3

NOTE: When choosing roller options for a walking greens mower, keep in mind that a heavier front roller adds more forward bias; this can help the operator track a straighter line and avoid skip cuts that result from bouncing the roller. A lighter roller can help an experienced operator perform spin turns more easily.
